Know Us Better

We Design, We Develop, We Deploy!

At AppManufact, we have a team of skilled software developers, designers, content developers, and marketers to provide spectacular digital solutions to our clients. We focus on delivering powerful applications and splendid services with quantifiable ROI that is built around clients' strategic vision and goals.

Our team of adept professionals continuously fulfills our clients' demands by constantly conquering new domains of expertise, boosting the quality of our services and products. We believe in building long-term relationships with our business partners by easily adapting to their requirements.

Our top-notch, full-stack engineering capabilities allow us to deliver unparalleled digital experiences to our partners. Deep expertise and years of experience in custom software development and core modern software concepts help us build agile solutions to meet every need of clients and their customers.

How We Work

AppManufact is a custom software development company that embraces flexibility, transparency, and authenticity. We follow the finest software development process devised to deliver splendid digital solutions.

Discovery

Every project begins with business and tech scrutiny of the idea. Together we discuss your requirements to create a roadmap for the complete project. It helps us to deliver the best outcomes that ensure long-term success.

Design

We design the products with a vision to meet the client's business goals. Our skilled design and development team build custom software solution using the best technologies to meet clients' requirements.

Implementation

To transform all the requirements into the product, our proficient software engineers move fast yet wisely with the intent to harness the full potential of modern-day technology. We develop a custom software solution that best suits clients' business requirements.

QA

Quality analysis is an integral part of AppManufact's custom software designing and development process. The QA phase helps us to fuse together the best methodologies and practices to ensure the delivery of a top-notch software solution.

Maintenance & Support

We make sure that your software works error-free, appropriately, and lives up to your technical and business expectations.

What We Do

Whether you want to upgrade your existing digital product or build a new solution from scratch, AppManufact is the one-stop solution for you. Our splendid product development process and tech experts help bring your vision into reality.

We infuse every action with honesty and fairness.

Successful Projects

Fulfillment Hub USA

Nowadays, one of the most important aspects of fulfillment businesses is to have a technically-advanced solution that allows adequate and hassle-free warehouse management. Our client wanted the software to help their customers in better management of order fulfilling, inventory, and shipping.

The solution provided by AppManufact is 5-in-1 cloud-based software that allows keeping orders, inventory, and shipping in one palace. It allows multi-channel integration, seamless inventory management, warehouse management, shipping management, and order management.

Are you looking for a world-class website?

We are into logistics, but we build stunning growth-focused websites, too. A website is the digital identity of a company, and a great website needs both beauty and brains. Get in touch with AppManufact, our subsidiary company that specializes in website and app development.
GET STARTED

Successful Projects

NFT Music Player
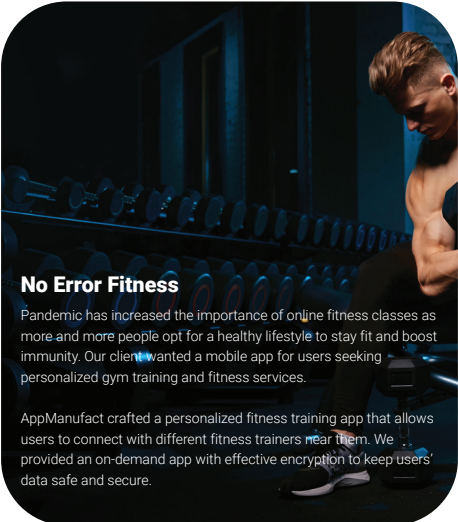

NFT is one of the best trends in the market, which is growing at a rapid pace and shows no sign of slowing down. In order to offer unique NFTs, our client required a block-chain-based encrypted music platform.

AppManufact designed and developed an NFT music player allowing users and artists to upload and trade music assets using cryptocurrencies. We provided a completely autonomous platform for music with the least involvement of third parties. The NFT music player is a perfectly developed music app allowing users to discover, upload, buy, sell, and trade music assets on their encoded networks using digital currencies.

Successful Projects

No Error Fitness

Pandemic has increased the importance of online fitness classes as more and more people opt for a healthy lifestyle to stay fit and boost immunity. Our client wanted a mobile app for users seeking personalized gym training and fitness services.

AppManufact crafted a personalized fitness training app that allows users to connect with different fitness trainers near them. We provided an on-demand app with effective encryption to keep users' data safe and secure.

Successful Projects

Architectural Modeling

With increasing digitalization, architectural presentations in the construction industry have moved from draft tables to desktops and tablets. Our client is a leader in temporary tent structures and temporary as well as permanent modular buildings. They needed a realistic model product library, including 3D models and visual aids for building ideas to boost the sales process.

AppManufact created a product library for the client that include high-quality, realistic 3D CAD and 3D Maya models with perfect real-time visualization feature. Our experts designed and developed 3D models with photorealistic quality characterized by visual effects to build a captivating atmosphere showing architectural assets to their best advantage.
